

# The Power of Sustainable Solutions

*Our multi-disciplinary teams provide customers with nearly forty critical support services for the energy generation, power transmission, and government infrastructure sectors.*

Tierra's solutions range from environmental engineering, surveying and mapping, subsurface utilities, to multi-stage soil and groundwater remediation. These initiatives support repowering projects that expand new generating capacity across legacy infrastructure.

- » Environmental Risk Assessment for Project Stakeholders
- » Subsurface Evaluations, Surveying and Mapping for Engineering Designers
- » Permitting and Environmental Compliance for Project Managers

## *Experience That's Smart.*

Tierra Group combines over a quarter-century of direct experience working alongside America's largest power and water utilities with a mastery of government program and project management. That makes us an ideal fit to fulfill your assessment of needs and build a smart priority list of mission-critical tasks.

## *Geoscience For Your Mission.*

Every day, Tierra Group engineers, geologists, surveyors and scientists tackle the complex projects other firms may shy away from. And this is why our reputation and customer list is growing to meet the needs of the sometimes uncertain environmental regulatory landscape.

Since we accomplish these missions every day, Tierra Group is specifically qualified to solve the complex and diverse geoscience challenges facing power utility operators today.

## *Assured Solutions Powered by Integrity.*

Tierra Group is a Service-Disabled Veteran-Owned Small Business (SDVOSB) with decades of global and domestic experience delivering critical services on time.

*Hire us for your next challenging infrastructure project to see the benefits of optimizing budgets and project schedules for improved results.*
